

Precious Cargo™
Transition specialists for
your life 🍀 your treasures 🍀 your home

The thought of moving is overwhelming - we understand.

Precious Cargo™ is a program of The Care Navigator to provide support to families in transition. Moving is a major transition that has the potential to cause conflict within families due to differences in opinion relative to the need to move and the timing of the move.

The Care Navigator has completed research in the community to listen and to gather information about the overwhelm that occurs with families and individuals in transition. Precious Cargo™ is the result of our research and daily experience supporting families in transition.

The research and a podcast about Precious Cargo may be found at www.preciouscargoexperts.com

Here's why we're the right resource for you:

- We're authentic - we have personal life experience in loss and transition.
- We have a proven record of education, credibility, expertise, ethics and trust.
- We are not a "referral service". We don't provide blanket lists and expect you to do the work. Many companies don't disclose information about how they're paid, offering their services as "free" when they're paid by the communities they recommend (and not all communities pay so you may not be given all the choices available). We work in your best interest and are paid for the value, time and money we're able to save you by helping you make the right move the first time.

Here's how we support you:

- The Care Navigator looks at the long term: helping you choose the "right" community, reviewing your health, financial and legal aspects to integrate short and long term needs.
- Based on a "clarity list", we recommend communities based on requirements we agree to be important. We have a 20 point checklist so you can compare "apples to apples".
- If Medicaid will be a payer source we help you plan ahead by identifying potential communities and setting realistic expectations of timing and acceptance into a Medicaid community.
- We help you review community agreements to ensure you understand the services provided.
- Based on a "clarity list", we recommend communities based on requirements we agree to be important. We have a 20 point checklist so you can compare "apples to apples".
